PROFESSIONAL SUMMARY

Technical Lead and Software Architect with over 9 years of experience building scalable enterprise systems across **.NET (8/10), React, and cloud databases**. Combines deep full-stack engineering with expertise in **Agentic AI development, LangGraph orchestration**, and developer enablement across large engineering organizations.

EXPERIENCE

PAYCOM, Dallas, Texas

Technical Lead - Custom Report Studio

April 2026 - Present

- Architected an enterprise file storage service using **.NET 10, PostgreSQL, and React**, structuring modular context boundaries to enable autonomous agent-driven development and maintenance.
- Contributed to developing a conversational report generator connecting a **.NET 8** backend with a **LangGraph** multi-agent service, translating user prompts into executable UI configurations for dynamic reporting.
- Assisted in building an internal multimodal LLM pipeline to extract structured data from complex PDFs, helping modernize legacy document processing workflows.
- Drove agentic development practices across 60+ engineers in the CRD organization, establishing prompt harnesses and multi-agent audit gates to accelerate team velocity.

Team Leader of Software Development - CRD

October 2022 - April 2026

- Led an agile team of six developers delivering core features for high-volume payroll systems that processed millions of enterprise records.
- Partnered with product managers and enterprise clients to define technical requirements upfront, cutting mid-sprint specification changes and speeding delivery.
- Optimized and integrated RDS MySQL and MSSQL databases, scaling architectures to support millions of employee records while ensuring strict OWASP compliance.

Software Developer

June 2020 - September 2022

- Developed custom PHP applications for 100+ clients and built automated scripts to import complex payroll data, reducing migration errors by 30%.
- Refactored legacy codebases for Linux compatibility and migrated environments to Docker, reducing deployment times from hours to 30 minutes while enabling local containerized testing.
- Practiced Test-Driven Development (TDD), writing comprehensive PHPUnit test suites to achieve 90%+ code coverage.

POWER WIZARD, Houston, Texas

Full Stack Engineer

July 2019 - May 2020

- Architected and launched a subscription-based Angular 8 web application in 3 months, driving initial customer onboarding and ARR growth.
- Implemented a RESTful backend using Zend Framework 3 and established autoscaling AWS infrastructure to ensure 99.9% application availability.

COGNIZANT (WITH DIRECT ENERGY), Houston, Texas

Full Stack Engineer

June 2016 - June 2019

- Developed web applications using Symfony and CodeIgniter, optimizing RDS-hosted MySQL queries to manage over 1 million customer records.
- Orchestrated the migration of legacy applications from physical Armor servers to AWS cloud, reducing hosting costs by 20%.
- Monitored custom CRM/CMS on the LAMP stack using CloudWatch, New Relic, and Splunk, reducing system resolution time (MTTR) by 15%.

EDUCATION

Texas A&M University, College Station, Texas
Bachelor of Science in Engineering, December 2015

SKILLS

- **Languages & Platforms:** C#, .NET (8/10), React, Python, JavaScript (ES6+), SQL, PHP.
- **Architecture & AI:** Agentic AI Systems, LangGraph, LLM Workflows, Microservices, System Design, OWASP.
- **Cloud & Databases:** AWS (EC2, S3, RDS, SQS), PostgreSQL, MySQL, MSSQL, Docker.
- **Frameworks & Tools:** ASP.NET Web API, Symfony, Angular, Git, CI/CD, TDD, New Relic, Splunk.
- **Leadership & Practices:** Technical Leadership, Cross-Team Enablement, Agile/Scrum, SDLC Modernization.
